Dear Friends:

I am writing to you at the request of several of my constituents who are opposed to reducing the frequencies available for radio-controlled model airplanes. It is my understanding that the FCC has proposed rules which would greatly reduce the availability of frequencies used by model airplane hobbyists.

My constituents are concerned that the reduction of frequencies now used for radio-controlled models will lead to increased risk of accidents and restrict their ability to operate their airplanes. They oppose the proposed rule as an unnecessary restriction.

They contend that the radio control frequencies in the 72 - 76 Mhz band are far enough apart from the land mobile frequencies that they have been able to share the band without either use interfering. They would like to continue to do so.

Please look into my constituents' comments and provide me
